The Goddess Speaks

DEDICATION

Dedicated to the creator of the universe - the
great energy within us all

I call it the Goddess as it contains 'God' within,
just like the word female contains male within.
The Goddess is not a strictly feminine energy, it
is all that is - the combined energy of the
universe - both known and unknown,
manifesting as all of us in all its infinite forms.
The Goddess also includes the various Gods and
Goddesses of the world who are nothing but
representations of our own inner powers.
Whether you are polytheistic, monotheistic,
atheistic or of any other category, you are a
divine being, made of love and this book is just
an awareness of this truth. Even if you feel you
do not understand it, there is a part of you that
understands everything, and I dedicate this
book to YOU.

FOUNDATION

'A human being is a part of the whole, called by us "Universe," a part limited in time and space.

He experiences himself, his thoughts and feelings as something separated from the rest, a kind of optical delusion of his consciousness.

This delusion is a kind of prison for us, restricting us to our personal desires and to affection for a few persons nearest to us. Our task must be to free ourselves from this prison by widening our circle of compassion to embrace all living creatures and the whole of nature in its beauty. Nobody is able to achieve this completely, but the striving for such achievement is in itself a part of the liberation and a foundation for inner security.'

Albert Einstein (1879 - 1955)
